

Amendments to the Claims: This listing of claims will replace all prior versions, and listings, of claims in the application

Listing of Claims:

36. (Currently Amended) An optical disk comprising:

a first substrate,

an information recording layer formed on said first substrate, and

a second substrate,

wherein said information recording layer is formed between said first substrate and said second substrate, said information recording layer has a track of a spiral shape, a data recording area and a barcode pattern are formed on said track, and said data recording area and barcode pattern are readable by light radiation.

37. (Previously Presented) An optical disk according to claim 36, further comprising another information recording layer formed on the second substrate.

38. (Currently Amended) A method of manufacturing an optical disk comprising the steps of:

forming a first substrate;

forming an information recording layer on the first substrate; and

forming a second substrate;

wherein said information recording layer is formed between said first substrate and said second substrate, said information recording layer has a track of a spiral shape, a data recording area and a barcode pattern are formed on said track, and said data recording area and barcode pattern are readable by light radiation.

39. (Previously Presented) A method according to claim 38, further comprising the step of:

forming another information recording layer on the second substrate.
